## Case Study: Financial Benefits of HUB Healthcare: Per-Case Savings and Value

### Introduction

In the rapidly evolving healthcare landscape, efficiency, cost-effectiveness, and improved patient outcomes are essential. HUB Healthcare's innovative software platform has been a game-changer for multiple healthcare providers, vendors, and support companies, delivering significant financial benefits. This case study delves into how HUB Healthcare enables an average savings of \$700 per patient case through optimized workflows, enhanced communication, and more.

### Background

HUB Healthcare offers a robust solution designed to streamline healthcare operations, enhance collaboration, and reduce costs. The platform addresses common challenges such as workflow inefficiencies, communication barriers, and scheduling conflicts, ultimately improving the entire patient care process.

### The Challenge

Several healthcare providers, including Summit Orthopedics, Capital Medical, and Cary Orthopedics, faced substantial operational challenges. These included inefficient surgical scheduling, high administrative costs, frequent scheduling conflicts, and high rates of case cancellations. These issues led to prolonged patient wait times, increased operational expenses, and reduced patient satisfaction.

### The Solution

To tackle these challenges, these healthcare providers adopted HUB Healthcare's comprehensive platform, featuring:

- **Workflow Optimization:** Reducing workflow steps by 25%.
- **Enhanced Communication:** Improving coordination among healthcare providers.
- **Patient Scheduling Efficiency:** Decreasing patient wait times.
- **Inventory Management:** Efficient handling and tracking of medical supplies.

### Financial Benefits and Savings

#### Reduction in Workflow Steps:

- **Claim:** 25% reduction in workflow steps.
- **Savings:** \$62.50 per case.
- **Validation:** This saving is calculated assuming an average administrative wage of \$25/hour and a reduction of 2.5 hours per case spread across multiple parties.

#### Hours Saved Monthly per Provider:

- **Claim:** 400 hours saved monthly.
- **Validation:** Based on 160 cases per practice at 2.5 hours per case.

#### Improved Communication Efficiency:

- **Claim:** Improved communication efficiency.
- **Savings:** \$75 per case.
- **Validation:** Assuming 3 hours saved per week (12 hours per month) at \$25/hour.

#### Patient Scheduling Efficiency:

- **Claim:** Reducing patient wait times.

- **Savings:** \$50 per case.
- **Validation:** Estimated based on improved throughput and patient handling efficiencies.

#### Implant Cost Reduction:

- **Claim:** 5-10% savings on implant costs.
- **Savings:** \$150 per case.
- **Validation:** Assuming an average implant cost of \$3,000.

#### Personnel Efficiency:

- **Claim:** 10-20% improvement in personnel efficiency.
- **Savings:** \$100 per case.
- **Validation:** Based on improved staff allocation and productivity.

#### Increase in Patient Satisfaction Scores:

- **Claim:** Up to 15% increase in patient satisfaction scores.
- **Savings:** \$50 per case.
- **Validation:** Assumed impact on overall operational efficiency and patient return rates.

#### Reduction in Case Cancellations:

- **Claim:** Decrease in case cancellations.
- **Savings:** \$1,000 per case.
- **Validation:** Estimated based on historical data of financial losses due to cancellations.

#### Reduction in Error Rates:

- **Claim:** 20-30% decrease in error rates.
- **Savings:** \$300 per case.
- **Validation:** Based on the cost implications of reduced medical errors.

#### Results

After implementing HUB Healthcare, multiple providers observed substantial improvements:

- Total Savings per Case: \$1,862.50
- Reduced Patient Wait Times: 20%
- Hours Saved in Administrative Tasks: 400 hours/month
- Improved Communication Efficiency: Saved 12 hours/month per provider

#### Summary

This breakdown demonstrates the financial benefits of HUB Healthcare, directly tying the savings to the cost of the platform on a per-case basis. The financial benefits per case include:

- Workflow Efficiency Savings: \$62.50
- Labor Cost Savings: \$25
- Communication Efficiency: \$75
- Scheduling Efficiency: \$50
- Implant Cost Reduction: \$150
- Personnel Efficiency: \$100
- Wait Time Reduction: \$80
- Patient Satisfaction: \$50
- Case Cancellations: \$1,000
- Error Rate Reduction: \$300

## Conclusion

HUB Healthcare's platform has delivered transformative financial benefits, enabling multiple healthcare providers, vendors, and support companies to achieve significant cost savings and operational efficiencies. By leveraging HUB Healthcare, these organizations have enhanced their financial performance, improved patient care, and increased patient satisfaction.
